Harsh Upadhyay

Aspiring Software Development Engineer | Java Backend / Spring Boot

upadhyayharsh569@gmail.com | LinkedIn | GitHub | LeetCode

B.Tech CSIT student focused on Java backend development with Spring Boot. Building practical software projects while strengthening REST API, database, object-oriented programming, and data-structure fundamentals.

EDUCATION

B.Tech, Computer Science and Information Technology

G.L. Bajaj Institute of Technology and Management

TECHNICAL SKILLS

Languages	Java, Python, C++, HTML, CSS
Backend	Spring Boot, REST APIs, Spring Data JPA
Database	MySQL
Frontend	React
Foundations	Object-oriented programming, CRUD, data structures and algorithms
Tools	Git, GitHub, Maven

SELECTED PROJECTS

SkillSwap — Java 21 | Spring Boot | React | MySQL

- Peer-to-peer platform for students to discover peers, propose skill swaps, and arrange shared learning sessions.
- Includes messaging, Q&A;, session reviews, notifications, and video-room support.
- Repository: github.com/Harshupadhyay2026/skillswap

Student CRUD REST API — Java | Spring Boot | Spring Data JPA | MySQL

- Created REST operations for adding, retrieving, updating, and deleting student records with a relational database.
- Repository: github.com/Harshupadhyay2026/springboot_crud_dev

Bank Management System — Java | OOP

- Practiced object-oriented programming with deposit, debit, transfer, balance, and interest features.
- Repository: github.com/Harshupadhyay2026/JAVA_PROJECTS_BASICS

Battery Notifier — Python | Termux

- Built a battery-monitoring utility that sends notifications for low charge and full charge.
- Repository: github.com/Harshupadhyay2026/Battery_notifications_project

Console Programming Projects — C++

- Worked on console exercises including library, bank, and student management programs and Tic-Tac-Toe.
- Repository: github.com/Harshupadhyay2026/Internship_portal

PROBLEM SOLVING

Practicing data structures and algorithms with Java on LeetCode. Profile: leetcode.com/u/harshupadhyay2026
